

ABSTRACT SUMMARY

Honorary Lecture

- H-1 Leptin expression in ruminants and its relationships with energy metabolism** 11
Chilliard Y., Delavaud C., Bonnet M.

Session I: Pituitary Axis

- K-2 The anterior pituitary gland: lessons from livestock and poultry** 12
Scanes C.G., Jeftinija S., Glavaski-Joksimovic A., Proudman J. and Anderson L.L.
- I-3 Do birds have three gonadotropin-releasing factors?** 12
Berghman L.R.
- I-4 The control of adenohipophysial hormone secretion by amino acids and peptides in swine** 13
Estienne M.J., Barb C.R.
- I-5 The release of growth hormone (GH): relation to the thyrotropic – and corticotropic axis in the chicken** 13
Kühn E.R., Geelissen S., Van der Geyten S., Darras V.M.
- I-6 Regulation of pituitary somatotrophs differentiation by hormones of peripheral endocrine glands** 14
Porter T.E.

Session II: The thyroid

- K-7 TH availability and activity in farm animal species: a review** 15
Decuypere E., Van As P., and Darras V.M.
- I-8 Potential involvement of mammalian and avian uncoupling proteins in the thermogenic effect of thyroid hormones** 15
Collin A., Cassy S., Buyse J., Decuypere E., Damon M.
- I-9 Thyroid hormone metabolism in the brain of domestic animals** 16
Rudas P. and Bartha T.
- I-10 Thyroid hormones (TH) in mammalian follicular fluid (FF). Enigma of the thyroid – ovary interaction** 16
Ślebodziński A.B.
- I-11 Hypothalamic control of the thyroïdal axis in the chicken: over the boundaries of the classical hormonal axes** 17
De Groef B., Vandenborne K., Van As P., Darras V.M., Kühn E.R., Decuypere E., and Geris K.L.

Session III: Ghrelin and related peptides

- K-12 Physiology of ghrelin and related peptides** 18
Anderson L.L., Jeftinija S., Scanes C.G., Stromer M.H., Lee J.-S., Jeftinija K., Glavaski-Joksimovic A.
- I-13 Studies of ghrelin function in the sheep** 18
Clarke I.
- I-14 Cell secretion and membrane fusion** 19
Jena B.P.

- I-15 Development and application of an ultrasensitive EIA for intact ghrelin** 19
Katakami H., Hashida S.
- I-16 Ghrelin – a hormone with multiple effects** 20
Korbonits M.

Session IV: Leptin – energy metabolism and reproduction

- K-17 Regulatory roles of leptin in reproduction and metabolism: a comparative review** 20
Zięba D.A., Amstalden M., Williams G.L.
- I-18 Leptin: a metabolic signal affecting central regulation of reproduction in the pig** 21
Barb C.R., Hausman G.J., Czaja K.
- I-19 Expression of leptin and its receptors in various tissues of ruminants** 21
Bartha T., Sayed-Ahmed A., and Rudas P.
- I-20 Seasonal reproduction in the mare: Possible role of plasma leptin, body weight and immune status** 22
Ferreira-Dias G., Claudino F., Carvalho H., Agrícola R., Alpoim-Moreira J., and Robalo Silva J.
- I-21 Feeding-unrelated factors influencing the plasma leptin level in ruminants** 22
Huszenicza Gy., Kulcsár M., Jánosi Sz., Lehtolainen T., Danko G., Kátai L., Delavaud C., Magdy H.G.I., Balogh O., Chilliard Y., Pyörälä S., Rudas P.
- I-22 Genetics and physiology of leptin in periparturient dairy cows** 23
Liefers S.C., Veerkamp R.F., Te Pas M.F.W., Van der Lende T.

Session V: Endocrinology of milk production

- K-23 Endocrinology of milk production** 24
Svennersten-Sjaunja K., Olsson K.
- I-24 Ovarian and IGF-I axis control of mammary development in prepubertal heifers** 24
Akers R.M., Ellis S.E., and Berry S.D.
- I-25 Normal and disturbed milk ejection in dairy cows** 25
Bruckmaier R.M., Weiss D., Macuhova J.
- I-26 Insulin-like growth factor binding proteins initiate cell death and extracellular matrix remodeling in the mammary gland** 25
Flint D.J., Boutinaud M., Tonner E., Kolb A., Whitelaw C.B.A., Beattie J., Allan G.A.
- I-27 Physiology of the periparturient period and its relation to severity of clinical mastitis** 26
Vangroenweghe F. and Burvenich C.

Session VI: Ovarian function in ruminants

- K-28 Ovarian function in ruminants** 27
Schams D. and Berisha B.
- I-29 The yin and yang of corpus luteum-derived endothelial cells: balancing life and death** 27
Meidan R., Kisliouk T., Podlovny L., Klipper E., and Rusiansky M.
- I-30 A blood flow: a key regulation of corpus luteum function in the cow** 28
Miyamoto A., Shirasuna K., Wijayagunawardane M.P.B., Hayashi M., Yamamoto D., Matsui M., Acosta T.J.

- I-31 Involvement of PAPP-A in the cleavage of IGFBP-2, -4 and -5 in dominant ovarian follicles in mammals** 29
Monget P.
- I-32 Role of tumor necrosis factor- α (TNF) and nitric oxide (NO) in luteolysis in cattle** 29
Skarzynski D.J., Okuda K., Jaroszewski J.J.

Session VII: Ovarian function in pigs

- K-33 Factors regulating ovarian function in pigs** 30
Madej A., Lang A., Brandt Y., Kindahl H., Madsen M.T., Einarsson S.
- I-34 The effect of feeding strategy on follicular development in the pig** 30
Hazeleger W., Soede N.M., and Kemp B.
- I-35 Oocyte-somatic cell-endocrine interactions in pigs** 30
Hunter M.G., Brankin V., Quinn R.L., Ferguson E., Edwards S.A., Ashworth C.J.
- I-36 Recruitment and selection of ovarian follicles for determination of ovulation rate in the pig** 31
Knox R.V.
- I-37 Susceptibility of reproduction in female pigs to impairment by stress or elevation of cortisol** 31
Turner A.I., Hemsworth P.H., Tilbrook A.J.

Session VIII: Effect of toxicants on endocrine function

- K-38 Consequences of endocrine disrupting chemicals on reproductive endocrine function in birds: establishing reliable end points of exposure** 33
Ottinger M.A., Quinn M.J. Jr., Lavoie E., Abdelnabi M.A., Thompson N., Hazelton J.L., Wu J.M., Beavers J., and Jaber M.
- I-39 Impact of endocrine disrupting chemicals on reproduction in Japanese quail** 33
Halldin K.
- I-40 Can farm animals help to study endocrine disruption?** 34
Magnusson U.
- I-41 Early embryonic administration of xenoestrogens alters vasotocin system and male sexual behavior of the Japanese Quail** 34
Panzica G.C., Mura E., Pessatti M., Viglietti-Panzica C.
- I-42 Appetite regulation in sheep: a potential site for therapeutic intervention in disease models** 35
Sartin J.L., Wagner C.G., Marks D.L., Daniel J.A., McMahon C.D.
- I-43 Endocrine disruptor impact via estrogen and androgen receptors in quail** 35
Shimada K. and Saito N.

Poster session

- P-1 Interrelation of the STH genotype (alui polymorphism) and first ovulation in postpartum (pp) dairy cows** 36
Balogh O., Kovács K., Kulcsár M., Kátai L., Zsolnai A., Gáspárdy A., Reiczigel J., Fésüs L., Huszenicza Gy.
- P-2 Characterization of the 5'-flanking transcriptional regulatory region of the chicken growth hormone gene** 36
Ip S.C.Y., Lau J.S., Au W.L., Leung F.C.

- P-3 Molecular characterisation of growth hormone single strand conformation polymorphisms haplotypes in “Serra da Estrela” ewes** 36
Marques M.R., Santos I.C., Belo C.C., Cravador A.
- P-4 Melatonin intensifies naloxon-induced LH secretion in luteal-phase ewes** 37
Misztal T., Romanowicz K.
- P-5 Lactation yield in relation to the secretion of prolactin and melatonin in polish longwool sheep** 38
Molik E., Ciuryk S., Misztal T., Romanowicz K.
- P-6 Effects of long-term growth hormone-releasing factor administration on hormone (GH, LH and progesterone) profiles in growing female buffaloes (Bubalus bubalis)** 38
Mondal M. and Prakash B.S.
- P-7 Beta-adrenergic and opioidergic modulation of cortisol secretion under physical and psychological stress** 39
Phogat. J.B. and Parvizi N.
- P-8 The effect of intracerebroventricular infusion of leptin on the GnRH and NPY hypothalamic neurons and pituitary LH cells in prepubertal lambs** 39
Polkowska J., Wójcik-Gładysz A., Wańkowska M., Misztal T.
- P-9 Do leptin and NPY influence GH secretion by porcine somatotroph cells?** 40
Saleri R., Cavalli V., Tamanini C.
- P-10 Polymorphism analysis at the growth hormone gene in “merino da beira baixa” ewes** 40
Santos I.C., Marques M.R., Belo C.C., Cravador A.
- P-11 The changes in the synthesis and storage of the pituitary gonadotropins during postnatal growth of lamb** 41
Wańkowska M., Wójcik-Gładysz A., Polkowska J.
- P-12 Effects of the intracerebroventricular infusion of genistein on the GnRH/LH axis secretory activity in ovariectomized ewes** 41
Wójcik-Gładysz A., Romanowicz K., Misztal T., Polkowska J.
- P-13 Effect of selenium supplementation on thyroid hormone levels and selenoenzyme activity in lambs** 42
Chadio S.E., Kotsampasi B., Zervas G., Menegatos I., Kalogiannis D.
- P-14 Thermal manipulations of broiler chickens during embryogenesis to improve thermotolerance acquisition - the role of thyroid hormones and corticosterone** 42
Yahav S., Collin A., Shinder D., and Picard M.
- P-15 Effect of fasting and refeeding on plasma ghrelin levels in prepubertal gilts** 43
Govoni N., De Iasio R., Galeati G., Parmeggiani A., Spinaci M., Pagotto U., Tamanini C., Pasquali R., Seren E.
- P-16 GH-releasing effects of ghrelin in ruminants** 43
Hashizume T., Horiuchi M., Nonaka S., Kasuya E., Hosoda H., Kangawa K.
- P-17 Ghrelin-growth hormone relationship in the coccidial infected chicken** 44
McMurtry J., Allen P., Richards M., Poch S., Vasilatos-Younken R.
- P-18 Serum leptin concentrations in lipizzan horses** 44
Čebulj-Kadunc N., Cestnik V., Kosec M.

P-19	Plasma leptin measurement in the dromedary camel and its relationships to adiposity and feeding level	45
	Delavaud C., Bengoumi M., Faye B., Tabarani A., Faulconnier Y., Sghiri A., Chilliard Y.	
P-20	Leptin level increases before postpartum first ovulation in dairy cows	45
	Giuliodori M., De La Sota R.L., Formía N., Chilliard Y., Delavaud C., Becú-Villalobos D., Lacau-Mengido I.M.	
P-21	Can embryonic leptin treatment affect chicken development?	46
	Máčajová M., Lamošová D., Herichová I., Griač P., Liu X., Sharp P.J., Zeman M.	
P-22	Expression of leptin receptor on the hypothalamic-pituitary-ovarian axis of the domestic hen	46
	Paczoska-Eliasiewicz H., Proszkowiec-Węglarz M., Cassy S., Słomczyńska M., Rząsa J. and Gertler A.	
P-23	Leptin and reproduction in the ewe	47
	Paquay R., Wergifosse F., Bister J.L., Pirotte C., Pirot P.	
P-24	Short-term effects of propionate and glucosamine infusions on leptin serum concentrations in goats	47
	Seybold C., Mielenz M., Sauerwein H.	
P-25	Effects of aging on mRNA expressions of the factors affecting meat quality or quantity in Japanese Black cows: PPARγ2, leptin, IGF-I, IGF-I receptor, Myostatin, PGC-1α	48
	Tanaka K., Fumita T., Etoh T., Shiotsuka Y., Hayashi K., Wegner J., Iwamoto H., and Gotoh T.	
P-26	Endocrine changes and tissue accretion rates in prepubertal heifers fed at moderate or high feeding level from 90 to 240 kg Bw	49
	Vestergaard M., Purup S., Boisclair Y., Sejrsen K.	
P-27	Nutrition, body condition and leptin in the ewe	49
	Wergifosse F., Bister J.L., Pirotte C., Pirot P., Paquay R.	
P-28	Effect of intramammary infusion of bovine somatotropin (bST) on milk yield by cows induced to lactate	50
	Crooker B.A., Weber W.J., Collier R.J., Denham S.C., McGrath M.F., and Vicini J.L.	
P-29	Relationship between a glucose challenge and milk production traits	50
	Hutchinson K.J., Mackenzie D.D.S., Blair H.T., Lopez-Villalobos N., Spelman R.J., Davis S.R.	
P-30	Hypertonic NaCl infusion causes milk let-down in goats	51
	Olsson K., Stein J.	
P-31	Effect of selection for milk yield on prolactin profiles in multiparous Holstein cows during the periparturient period	51
	Weber W.J., Baumgard L.H., Chester-Jones H., Hansen L.B., Crooker B.A.	
P-32	Prolonged adrenal stimulation does not affect plasma DHEA in the dairy cow	51
	Gabai G., Testoni S., Marinelli L., Mollo A., Simontacchi C., Bono G.	
P-33	Estrual and ovarian activity in pelibuey ewes continuously or intermittently exposed to the rams	52
	González A., Santiago H., Martínez J.C., Lucero F.A.	
P-34	Endocrine changes in two behavioral types of cow exposed to heat	52
	Gudev D., Raltcheva S., Moneva P., Johnson H.D.	

- P-35 Insulin-like growth factor binding proteins (IGFBPs) in camels: Revelation by Western ligand blotting and partial purification of insulin-like growth factor binding protein-3 (IGFBP-3)** 53
Hammadi M., Colinet F., Khorchani T., Moslah M., Portetelle D., Renaville R.
- P-36 Circannual productive and reproductive characteristics and testosterone levels in rams of tropical hair sheep breeds in Mexico** 53
Hernández J., González A., Iriarte E., Briones F., Martínez J.C., Lucero F.A.
- P-37 Mechanisms of progesterone action on inhibiting apoptosis in bovine luteal cells** 54
Korzekwa A., Shibaya M., Murakami S., Woclawek-Potocka I., Okuda K., Skarzynski D.J.
- P-38 Differential effects of PMSG on ovarian and estrual activity in crossbred beef heifers treated for synchronization of estrus, under tropical environments** 54
Lucero F.A., Hernández J., Martínez J.C., Duarte A., González A.
- P-39 Double fluorescent immunohistochemistry (dF-IHC) of the Pregnancy-Associated Glycoprotein (PAG) family expression in domestic and relative wild Artiodactyla species** 55
Majewska M., Gizejewski Z., Panasiewicz G., Borkowski K., Szafranska B.
- P-40 Experimental evidences on the relationship among metabolic status, environmental factors and sex ratio in dairy cows in intensive breeding** 55
Marusi A., Marasi G., Fusari A., Ubaldi A.
- P-41 Changes in IGF-1 concentration and reproductive disorders in heifers with acute dietary restriction** 56
Nakada K., Goto A., Ishikawa Y., Sawamukai Y.
- P-42 The adverse effect of steroid treatment on ovulation in norgestomet treated river buffalo (*Bubalus bubalis*)** 57
Niasari-Naslaji A., Rastegarnia A., Hovareshti P., Kordnejad E., Seraj M.J., Sarhaddi F.
- P-43 The effects of PMSG dose and time of administration on time of estrus, ovulation rate and prolificacy in tropical hair sheep** 57
Trejo F.J., González A., Vázquez J.F., Loya F.M., Quintero A., Cienfuegos E.G.
- P-44 Feed intake and light/dark effects on the circadian blood changes of some hormones in dairy cows** 58
Trevisi E., Lombardelli R., Piccioli-Cappelli F., Bertoni G.
- P-45 Serum insulin concentrations in high yielding dairy cows prior to ovulation or cystic follicle formation** 58
Vanholder T., Leroy J., Opsomer G., De Wulf J., de Kruif A.
- P-46 Changes in the density of sympathetic nerve terminals and in the content of catecholamines in porcine ovaries with dexamethasone-induced polycystic status** 59
Dzienis A., Majewski M., Wojtkiewicz J., Piskuła M., Jana B.
- P-47 Influence of fasting on ET-1 system in swine corpora lutea** 59
Forni M., Zannoni A., Ribeiro L.A., Govoni N., Spinaci M., Bacci M.L., Galeati G., Tamanini C.
- P-48 Effects at puberty on plasma testosterone levels and leydig cells surface density in boars exposed to di(2-ethylhexyl) phthalate at weaning** 60
Ljungvall K., Karlsson P., Hultén F., Madej A., Norrgren L., Einarsson S., Rodriguez-Martinez H., Magnusson U.

- P-49 A study on the effect of season of birth and different nutrition levels on the attainment of puberty in wild boar gilts (*Sus scrofa*) in extensive farming systems in Greece** 60
Maglaras G., Vatzias G., Beard A.P., Asmini E., Edwards S.A.
- P-50 Expression of estrogen receptors and aromatase p450 in the boar testis demonstrates a paracrine and auto and intracrine regulatory role of estrogen** 61
Mutembei H.I., Pesch S., Schuler G., Hoffmann B.
- P-51 Follicle development during luteal phase and altrenogest treatment in pigs** 62
Soede N.M., Hazeleger W., Bouwman E.G., Langendijk P., Van de Laan I., Kanora A., Kemp B.
- P-52 Reproductive hormone secretion in the caspian miniature mares** 62
Dordari S.G.M., Seyed Abbadi M.
- P-53 The efficiency of in vivo transfection of uterine and oviductal epithelium depends on the hormonal status** 63
Esponda P., Relloso M.
- P-54 The effect of feather plucking on plasma concentration of corticosterone in geese after first laying cycle** 63
Janan J., Tóth P.
- P-55 Early embryonic administration of xenoestrogens alters vasotocin system and male sexual behavior of the Japanese quail** 64
Mura E., Pessatti M., Viglietti-Panzica C.
- P-56 Three useful genomic DNA templates of European/American bisons (*B. bonasus* L., *B. bison*), red/roe deer (*Cervus elaphus*, *Capreolus capreolus*) and wild pig (*Sus scrofa* L.) for Pregnancy-Associated Glycoprotein gene family (PAG) examination** 64
Szafranska B., Kuber K., Panasiewicz G., Majewska M., Gizejewski Z., Zalewski K.
